My 8 months internship experience at Terato Tech Sdn Bhd
Belajar Laravel Melalui Contoh

Ts. Mohd Hafiz Suhaimi

Senior Engineer & Trainer | Guiding Developers to Build Better Software | Laravel & DevOps
Cyberjaya, Selangor, Malaysia

Summary

I'm a Senior Software Engineer and Technical Trainer, passionate about helping developers and teams build better, more reliable software through practical learning and modern engineering approaches. With strong expertise in Laravel and DevOps, I turn technical challenges into learning opportunities, both in enterprise projects and through community training initiatives.

At Ideagen ICT, I contribute as a driving contributor in large-scale software delivery projects, supporting engineering improvement efforts and promoting better development practices. Beyond my organizational role, I actively train and mentor the wider tech community, including students, junior engineers, and professionals seeking to upskill.

I've completed postgraduate research (Msc) at UiTM on improving test reliability in Continuous Delivery pipelines, which strengthened my approach to addressing software quality challenges. I now apply these insights in both engineering work and training through hands-on workshops and structured learning modules.

Experience

Ideagen
Senior Software Engineer
July 2024 - Present (2 years 5 months)
Kuala Lumpur, Malaysia

> Implemented automated testing workflows using BackstopJS and PHPUnit, reducing release errors and increasing delivery confidence across deployments.

> Engineered a customised Claude agent integrated with Atlassian and GitHub MCP, accelerating bugfix and code review cycles from 3 days to 1 day (≈67% faster turnaround).

> Delivered the Hazardous Substance Management module for EHS Core, supporting product enhancement and contributing to new client signups.

> Optimised API performance by reducing response time from several minutes to under one second, significantly enhancing system responsiveness and user experience.

> Supported developers onboarding and mentorship, expediting junior engineers productivity within their first month.

Pisyek Studios
Founder & Principal Consultant
November 2011 - Present (15 years 1 month)
Kuala Lumpur, Federal Territory of Kuala Lumpur, Malaysia

Pisyek Studios is my own practice, which I run alongside my full-time roles. I build custom web systems for businesses and run hands-on technical training for developers. It kept me writing code through my years in HR at PETRONAS (2012–2017) and led me back to full-time engineering.

Custom system development
> Built and delivered few custom web systems for SMEs, including eCommerce for Haurra Sewing Studio.
> Run each project end to end: requirements with the client, architecture, build, deployment to cloud servers and support after launch.
> Maintain and modernise older client systems: refactoring, fixing performance problems and upgrading old CodeIgniter apps to Laravel.

Technical training
> Run hands-on workshops on Laravel, Docker, Git for students, junior developers and working professionals. 100+ participants trained since 2021.
> Author of "Belajar Laravel Melalui Contoh", a Bahasa Melayu guide that teaches Laravel through worked examples.
> Turned my MSc research at UiTM (test reliability in continuous delivery pipelines) into practical training modules on testing and CI/CD.
> Publish Laravel and web development tutorials at pisyek.com.

RunCloud
Senior Software Engineer
February 2022 - June 2024 (2 years 5 months)

Cyberjaya, Selangor, Malaysia

RunCloud is a Malaysian SaaS control panel for deploying and managing PHP and WordPress sites on cloud servers. The platform manages more than 50,000 servers across AWS, DigitalOcean, Linode, UpCloud, Hetzner and other providers.

> Built new features and fixed bugs across the whole product: the Laravel API, the Vue.js dashboard and the Go server agent that runs on customer servers.

> Enhanced the API with a Cloudflare integration that lets users manage SSL and DNS from RunCloud, rolled out to all users including enterprise customers.

> Developed a white-label feature that lets businesses run the RunCloud dashboard under their own brand (still in development when I left).

> Built automated Selenium regression tests to catch broken features before each release.

> Led the RunCloud certification training programme, teaching professionals from private companies and university lecturers.

> Reviewed code and mentored engineers on the team.

Experian

PHP Developer

November 2019 - January 2022 (2 years 3 months)

Greater Kuala Lumpur

Maintain and develop new features on Alchemy Social, a social media advertising platform manager. Work closely with other team members based in the United Kingdom (UK).

Write shell & python 3 scripts to automate internal processes.

Develop a dashboard using the Flask framework for monitoring and maintaining the data integration inventory.

Tech stack:

1. Zend 2 framework
2. MySQL
3. NginX

4. RabbitMQ
5. ELK
6. Git
7. CentOS 7
8. Flask Framework
9. Splunk Enterprise

Sunway Group
Senior Software Engineer
May 2017 - November 2019 (2 years 7 months)
Selangor, Malaysia

I'm accountable for developing and improving an e-Procurement system (Metabuyer) for Sunway Group. I work closely with other 8 software engineers; including other teams i.e. Business Analyst and Quality Assurance team.

Successes included rolled-out 2 major features i.e. (1) Supplier web; which allow suppliers to log into Metabuyer and manage their purchase order within the system, and (2) Split purchase order (PO); users can raise purchase requisitions (PR) and split the PO to several companies.

Among other BAU are researching and optimizing legacy code, fixing bug/ hotfix, reviewing peers code, mentoring interns, and sharing sessions among developers.

Tech stack:
1. Laravel 5
2. MongoDB / MySQL / PostgreSQL
3. AngularJS
4. Git
5. LEMP/LNMP
6. Docker
7. Node.js
8. AWS

PETRONAS
5 years 2 months

Executive (Talent Sourcing)
January 2016 - May 2017 (1 year 5 months)

Kuala Lumpur, Federal Territory of Kuala Lumpur, Malaysia

Plan, manage and execute the recruitment of permanent, contract staff (Expatriate/Local/Direct Hire) and contract retiree for Group Tax and Group Treasury in line with PETRONAS recruitment policies and procedures.

- Source for candidates via LinkedIn, Monster, Jobstreet, RigZone and other channels
- Pre-screen CVs, phone screening
- Process candidate applications via in-house recruitment portal and manual forms
- Arrange interview session
- Prepare offer package
- Facilitate on-boarding for new hires

Achievement (2016)
-Recruited 24 staff at executive and manager level for Group Tax, Treasury, and Finance & Accounts Services Dept.
-Facilitated recruitment of 119 non-executives for Finance Shared Services Dept.

Executive (People Planning & Org. Design)
April 2012 - December 2015 (3 years 9 months)
Kuala Lumpur, Malaysia

Plan, prepare and manage the implementation of HR Planning that covers annual HR Plan & Budget and Organization Design and Job Design/Analysis/ Grading for Finance Division, PETRONAS Holding Company in line with the approved HRM Policies and Procedures to ensure manpower cost optimization in meeting business requirements.

Guide and advise Line Dept’s Focal in the preparation of their respective annual HR Plan and Budget (HRPB) through coordinating HRPB clinic, training and review sessions, to ensure manpower optimization in relation to appropriate manning level, cost effectiveness and compliance to the HRPB requirements.

Prepare manpower monthly and quarterly reports for management.

Terato Tech Sdn Bhd
Web Developer
June 2010 - January 2011 (8 months)
Bandar Baru Bangi, Selangor

Involved in various web application development using codeigniter framework.

Education

Universiti Teknologi Petronas

BTech (Hons), ICT majoring in Software Engineering · (2008 - 2011)

Universiti Teknologi MARA

Master of Science, Information Technology · (October 2023 - February 2026)

SM Sains Dungun

High School, Sains Tulen · (2005 - 2006)

SMKA Wataniah Alor Keladi

High School, PMR · (2002 - 2004)
